LIVE PRODUCTION STUDIO

WHO WHAT HOW & WHY

streamstar

A technology company specialising in the development of live production solutions for the streaming video industry.

Innovative production tools that revolutionized the ways live events are currently produced.

High degree of automation, extreme flexibility, speed and ease-of-use enable a single operator to produce highest quality, professional, multi-camera live productions.

Relied upon by production companies and TV channels around the world and helping them to deliver top quality content to millions of viewers.
